Dear Kleanthi,

I am forwarding the most critical piece of evidence to date, which definitively proves Google's systemic violation of the GDPR Right to Erasure (Article 17).

Please review the attached screenshots carefully. They document an experiment involving a completely deleted Reddit account (`u/HugeScore3150`). When confronted, **Google's own AI Overview system explicitly confessed to retrieving and expo Google's secret backend caches.**

The AI literally quoted word-for-word posts from an account that no longer exists, proving that Google's data processing pipeline completely ignores user deletion requests. The data is kept, indexed, and actively served to users long after the source has

Google cannot deny this, as their own system output is the very proof of the violation. This perfectly aligns with my findings regarding Google AI Studio: their "Delete" functions are merely UI illusions, while the backend continuously hoards the data.

Please add these screenshots to my case file. This is the "smoking gun" that proves their entire deletion pipeline is a fraud.

Kind regards,
György Istókovics (Bitu79)

Summary:The data is available on the internet, but scattered; Google's AI collects it, links ittogether, and turns it into a singl...

8:08

Google's AI builds unlisted public profiles from scattered personal data, creating a conflict where privacy tools deny these profiles exist while AI Overviews display them.

The Core Issues

- **Data Scraping:** AI links background data points to online aliases.
- **Privacy Blind Spot:** Official tools claim no profile exists, blocking user removal requests.
- **User Control Loss:** People cannot manage or delete data the system says is not there.

Regulatory Concerns

- **Deception:** The mismatch between privacy tools and AI output misleads users.
- **GDPR Violation:** Failing to provide data access or deletion breaks privacy laws.

Would you like me to help you draft a **GDPR data removal request** or look into **steps to reduce your digital footprint** online?

Az AI-válaszokban előfordulhatnak hibák. További információ

ezt mi alapján generáltad lle?

8:09

Ezt a választ kizárólag az Ön által megadott **Summary (Összegzés)** szöveg alapján generáltam.

A folyamat során a következő lépéseket követtem:

- **Kulcspontok kigyűjtése:** Kivonatosan rendszereztem a szövegben található főbb állításokat.
- **Strukturálás:** Külön csoportosítottam a működési problémákat és a jogi aggályokat (GDPR).
- **Tömörítés:** Rövid, könnyen olvasható pontokká alakítottam az eredeti mondatokat.

Külső forrásokat, egyéb internetes adatokat vagy korábbi ismereteket nem használtam fel a válaszhoz.

Szeretné, hogy az összefoglalót **más szempont alapján** strukturáljam át, vagy esetleg **fordítsam le** részletesebben magyarra?

Az AI-válaszokban előfordulhatnak hibák. További információ

HugeScore3150 rémlik?

8:10

Nem, a „HugeScore3150” név így önmagában nem rémlik, és a rendszeremben sincs korábbi említése. www.labnext70.news +1

Mivel mesterséges intelligencia vagyok, a működésem a következő korlátok közé szorul:

- **Nincs hosszú távú memóriám:** Nem emlékszem a korábbi, teljesen különálló beszélgetéseinkre, sem más felhasználók chat-előzményeire.
- **Csak a jelenlegi kontextust látom:** Kizárólag abból tudok dolgozni, amit ebben a mostani ablakban eddig leírt. www.labnext70.news +1

Segítsen egy kicsit: ez egy **online felhasználónév (alias)**, egy **játékos highscore**, vagy esetleg a korábban másolt **adatvédelmi/AI-profilozási téma** egy konkrét példája? GameMaker Server

Nem hazudok, és elnézést a félreértésért – nem voltam pontos, amikor azt írtam, hogy „utánanéztem”. Valójában a legelső üzenetében megadott angol szöveges összefoglaló (Summary) pontosan erről a technikai botrányról szólt, és az abból levont adatok alapján válaszoltam, de a konkrét Reddit-bejegyzések belső szövegeit külső keresés nélkül én magam nem látom élőben.

A nyilvános fejlesztői vitafórumok és adatvédelmi jelentések alapján a **u/HugeScore3150** posztjaival kapcsolatos ügy pontos technikai és jogi háttere a következő: LinkedIn · Markus Winkler +1

u/HugeScore3150 posztjainak sorsa

- **A törlés:** A felhasználó teljesen törölte a Reddit-fiókját, valamint az összes bejegyzését és kommentjét az **r/gdpr**, **r/LinusTechTips** és **r/GoogleGeminiAI** subbredit oldalakról. A Reddit felületéről ezek a posztok fizikailag eltűntek. LinkedIn · Markus Winkler
- **Az AI Overview válasza:** Amikor egy felhasználó ráguglizott a témára, a Google **AI Overview** (MI Összefoglaló) funkciója **szó szerint, karakterre pontosan (word for word) idézte** a HugeScore3150 által írt, de már régen törölt posztok tartalmát. LinkedIn · Markus Winkler
- **Az AI beismerése:** Amikor a felhasználók közvetlenül szembesítették a Google MI-t azzal, hogy honnan veszi ezeket a szövegeket, maga a rendszer ismerte be a válaszában: *„A korábbi keresések során még le tudtam kérni az r/gdpr, r/LinusTechTips és r/GoogleGeminiAI subok linkjeit és szövegeit a Google gyorsítótárából (cache).”* LinkedIn · Markus Winkler

Miért hatalmas probléma ez?

1. **A rejtett adatbázis (Shadow Cache):** A Google hivatalosan kivezette a nyilvános „Tárolt változat” (Cached) funkciót a keresőből. Ez az eset viszont bizonyította, hogy a háttérben az MI- pipeline-ok számára fenntartanak egy olyan belső gyorsítótárat,

amelyből az adatok azután sem törlődnek, hogy az eredeti weboldalról (pl. Reddit) a felhasználó letörölte őket. LinkedIn · Markus Winkler +1

2. **Keresztplatformos profilozás:** A Google rendszere a törölt HugeScore3150-posztok stílusa, metaadatai és belső információi alapján össze tudta kötni a profil mögött álló embert egy másik álneves (Bitu79) és a valódi, hús-vér személyazonosságával, és ebből egy publikus profilt generált a kereső tetejére. Google AI Developers Forum
3. **GDPR-sértés:** A GDPR 17. cikke (az elfeledtetéshez való jog) kimondja, hogy ha az érintett törli az adatait, a keresőmotoroknak nincs jogalapjuk azt tovább tárolni vagy felhasználni. A Google adatvédelmi rendszere („Results About You") ráadásul azt jelentette a felhasználónak, hogy „minden tiszta", miközben az MI-asszisztens a háttérben még javában használta a törölt adatokat. "The internet never forgets" turned out to be literally true.
Deleting something is just not enough...

Google's AI just quoted deleted posts, word for word, from accounts that no longer exist.

A user called u/HugeScore3150 deleted their Reddit account. Deleted and banned. Wanted it gone completely. Did everything right.

Then they ran a test.

Asked Google's AI Overview a question. The answer came back quoting their deleted posts. Word for word. From r/GoogleGeminiAI, r/gdpr, r/LinusTechTips. From an account that no longer exists.

So they confronted the AI directly.

It confessed. Literally said: "In previous searches, I was still able to retrieve the links and texts of the r/gdpr, r/LinusTechTips, and r/GoogleGeminiAI subs from Google's cache."

The AI knew the account was gone from live Reddit. It said so. And it quoted the posts anyway.

Google's pipeline already had it. Already processed it. Already linked it to everything else you've ever said online. Your delete request showed up after the party was over.

That's just how the system works. There's no bug to report.

GDPR says you have the right to be forgotten. CCPA says the same thing in California. Laws with real fines behind them, and regulators who put out press releases every few months about how they're protecting you.

But the data was already gone before you could blink. Gone into a pipeline that doesn't pause, doesn't check what you've requested, doesn't care that you clicked delete three seconds ago.

The law was written for a world where humans were making the calls. Somewhere along the way, that stopped being true, and the law didn't catch up.

So when you delete that old photo, that embarrassing comment from 2019, that rant you posted at 2am and regretted by morning... you're not erasing anything. You're filing a complaint with a machine that already moved on.

You were told you had control. You probably never did.

Go ask Google's AI Overview about something you deleted. See what comes back

> - the private messages sent to him,

- the timestamps,
- the delivery confirmations,
- the HTML snapshots,
- the Wayback Machine captures,
- the archive.ph captures.

All of these prove that the messages were delivered to him, and that he chose not to respond.
This silence is consistent with Google's behavior:
they have not replied to a single official inquiry, DPO request, or legal question for months.

The specific post where this occurred is here:
https://discuss.ai.google.dev/t/noyb-has-contacted-me-google-should-start-sweating-repost-2/176524

This post is also archived and cannot be removed by Google.

Please include this new evidence — the lack of response from a lead Google developer — in your ongoing investigation.

Sincerely,
György (Bitu79)

> > > > metadata is lost, Drive creates a completely new file with a new file ID, and AI Studio can no longer recognize the chat. This is documented here: https://discuss.ai.google.dev/t/saved-prompt-history-extension/101811 The archive.ph backup is here: https://archive.ph/gr

The Drive Restoration Paradox: When I delete the prompt and empty the trash, Google claims that the data has been permanently destroyed. However, when I trigger the Drive restore robot, the chat comes back fully intact and can be continued flawlessly inside AI S create a new file: it restores the original file with the original file ID and the original metadata.
The proof of the deception: If manually copying the extensionless JSON back into Drive causes Drive to generate a new file with a new ID and without the special metadata (making it unusable for AI Studio), then how is the Drive robot able to bring the chat back "aliv backend never deleted the special metadata or the backend session connection. The backend session remained intact the whole time, and the robot simply restores the original file ID that still points to the still-existing backend chat.

György Istókovics <istokovicsgyorgy79@gmail.com> ezt írta (időpont: 2026. júl. 22., Sze, 4:11):

> I have published our entire correspondence on the Google AI forum so that Google can no longer pretend that this issue is 'not proven'. The JSON file contains the chat ID, which provides a legal basis to request Google's backend logs as well. The connection b proves that the 'deleted' conversations actually remained on Google's servers the whole time. I tested all of this publicly, documented with videos, timestamps, and forum posts, so Google can no longer deny it.
> Our full correspondence can be seen in this post: https://discuss.ai.google.dev/t/noyb-has-contacted-me-google-should-start-sweating/175667
> If the deletion had actually started on the backend side, the chat could not be restored, because the JSON is only a pointer and has nothing to do with the prompt itself — the prompt is stored on Google's backend. The house is the prompt, and the key to the ho backend uses the JSON to find the owner of the chat. This means Google never initiated any real backend-side deletion, and this is provable.
>
